EXPERIENCES

Healthfirst

New York, NY, USA

Service Recovery Analyst

Sept. 2024 - Present

- Acted as both IT Communications and Incident Manager for P1/P2 incidents, coordinating incident response and providing timely business updates while also supporting company-wide knowledge management on ServiceNow, helping restructure documentation processes to improve accuracy and findability.
- Identified and addressed inconsistencies in ServiceNow incident forms, collaborating with the Service Management team to implement improvements that enhanced operational efficiency and customer experience.
- Designed and built a full-featured React dashboard with automated ticket/incident categorization, evolving an earlier Streamlit prototype into a far more capable internal tool that gives non-technical stakeholders self-serve visibility into trends without engineering support.
- Contributed to a cross-functional spike project building a data observability dashboard, normalizing outputs from AWS Athena, Glue jobs, and SQL Server into a unified SQLite backend to surface in-depth product health and usage metrics; contributed to wireframing and led deployment using AWS Lambda and EventBridge.
- Automated recurring communication workflows using Power Automate, including a weekly on-call notification that replaced a 15+ minute manual process split across three emails with one automated send to 1,000+ recipients, plus mass user-notification campaigns with automatic manager CC'ing.

The New York Times

New York, NY, USA

Backend Engineering Intern

June 2024 - Aug. 2024

- Integrated into a high-impact team of senior level engineers, actively participating in Agile ceremonies such as daily stand-ups, sprint planning, and retrospectives using Miro and Jira, which enhanced team collaboration and project delivery.
- Utilized BigQuery and its API to analyze data across three separate databases, identified inconsistencies, defined use cases to guide resolution strategies, and ensure data integrity.
- Configured Amazon RDS for seamless data integration with Google Cloud Platform (GCP) via Fivetran and PrivateLink, optimizing data synchronization and security using Terraform for infrastructure as code, and DbVisualizer for database management.

EDUCATION

Northeastern University

Jan. 2025 - April 2026

M.S in Information Systems

Boston, MA

Brooklyn College, CUNY

Aug. 2021 - May 2024

B.S in Computer Science | **Minor** in Philosophy

Brooklyn, NY

SKILLS

- **Tools and Technologies:** Trello, AWS, Git, Android Studio, Unity, Figma, PostgreSQL, MySQL, SQLite, GQL, pgAdmin4, Ms365, OCR, Postman, IntelliJ, Visual Studio Code, Datadog, Vault, Sumologic, Docker, ServiceNow, Power Automate.
- **Programming Languages and Frameworks:** Java, JavaScript, HTM, C# Go, React, Redux, Spring, Arduino, GraphQL, REST.
- **Natural Languages:** English, Bengali.
- **Certification:** AWS Certified Cloud Practitioner, ITIL V4 Certification.
